

NGS High temperature Grease

NGS High temperature Grease is a premium quality grease, using a synthetic thickener. It is suitable for electric motors and similar applications.

Characteristic	Product Name	Packaging
NLGI consistency class 2–3 Thickener synthetic Colour red Base oil type synthetic Operating temperature range –40 to +200 °C Base oil viscosity 40 °C, mm ² /s 96 Mechanical stability Roll stability, 50 hrs at 80 °C, 10–1 mm 365 max.	NGS High temperature Grease	1000 gr . CAN

Application

- Electric motors: Small, medium and large
- Industrial fans, including high speed fans
- Water pumps
- Rolling bearings in textile, paper processing and drying machines
- Applications with medium and high speed ball (and roller) bearings operating at medium and high temperatures
- Clutch release bearings
- Vertical shaft applications
- Kiln trucks and rollers
